I am a curiosity-driven fullstack developer with a focus on frontend and nearly 5 years of professional experience building web apps with Svelte, React, Sass, Node.js and Capacitor. I also do regular live coding streams on Twitch and occasionally write on my blog.

Work Experience

Datawrapper **Fullstack Developer** **Aug 2022 - Apr 2023**

- Enhanced app stability by migrating Svelte 2 to Svelte 3 components in the app charts and maps editor
- Contributed to a micro frontend architecture by maintaining multiple plugins
- Reduced errors by extensively testing Svelte components using Mocha and Chai

Svelte / Sass / Node / Chai / Mocha / Docker

Ferreri **Frontend Developer** **Oct 2021 - Aug 2022**

- Implemented and maintained design systems with React and Storybook, organized in presentational and container components
- Worked with a team of 5 developers to reduce paperwork of a insurance company
- Automated code formatting and linting with GitLab CI and Git hooks
- Tested React components with Jest

React / Next.js / TypeScript / Storybook / styled-components / Jest / Docker
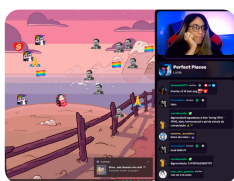

WAS Software **Fullstack Developer** **Oct 2018 - Sep 2021**

- Introduced Svelte to deploy a delivery app with over a month in advance of the deadline
- Published a Capacitor mobile app with offline support and push notifications
- Assisted in building a fully-fledged ERP with CodeIgniter 3

Svelte / Sass / Capacitor / CodeIgniter / WordPress / MySQL

Projects

Live coding

I do live coding streams regularly on Twitch, with custom commands and visuals powered by Svelte.
